CHANON SUNGCHOOM

Backend Developer

chanon.sungchoom@gmail.com | (+66) 62-559-6469 | BreakDown-CS

PROFESSIONAL SUMMARY

Backend Developer with hands-on experience building enterprise applications for warehouse, repair, inventory, technician, and cost management operations. Experienced in developing and maintaining RESTful APIs using Golang, Fiber, and GORM, with Clean Architecture-inspired design. Skilled in Oracle, PostgreSQL, and MySQL integration, complex business logic, validation, transactions, reporting, and production troubleshooting. Also experienced in developing supporting frontend features using React and TypeScript.

WORK EXPERIENCE

Programmer / Backend Developer **February 2025 - Present**

Nippon SySits Co., Ltd

- Developed and maintained 60+ RESTful API endpoints using Golang, Fiber, and GORM for warehouse, repair, inventory, technician, and cost management systems.
- Designed backend services using a Clean Architecture-inspired structure with handlers, services, repositories, domain models, and interfaces.
- Integrated Oracle, PostgreSQL, and MySQL databases to support complex cross-system business workflows and data operations.
- Implemented repair management workflows, including barcode validation, stock/return checking, status transitions, repair history, cost calculation, and approval processes.
- Developed furniture assembly workflows covering request, product validation, staff assignment, approval, payment, cancellation, and configuration management.
- Implemented file/image management with MinIO and developed PDF/report retrieval and export integrations.
- Developed supporting frontend features using React, TypeScript, Ant Design, Vite, and React Router, integrating REST APIs for enterprise workflows.
- Troubleshot and resolved production issues involving SQL, database connectivity, transactions, API errors, and data consistency.
- Leveraged AI-assisted development tools to accelerate debugging, analyze complex code and SQL issues, identify root causes, and improve problem-solving efficiency.

EDUCATION

Bachelor's degree

Rajamangala University of Technology Krungthep, 2023

- Final GPA 3.37

TECHNICAL SKILLS

- Languages:
  - Go (Golang), TypeScript, JavaScript, SQL
- Backend:
  - Go Fiber, GORM, RESTful API, Clean Architecture, Repository Pattern, Service Layer
- Databases:
  - Oracle, PostgreSQL, MySQL, Database Transactions
- Frontend:
  - React, TypeScript, Ant Design, Vite, React Router, Axios
- Storage & Services:
  - MinIO, REST API Integration
- Development Tools:
  - Git, Postman, VS Code, Antigravity IDE
